

LocalAdLink uses **geo-targeting technology** which determines the **IP Address** of a website visitor and delivers **targeted** content to that visitor based on their **location**.

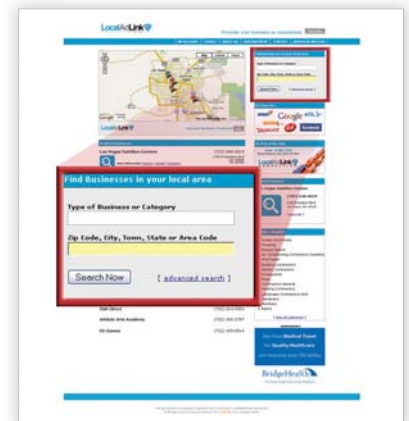

How IP Addresses Work:

Every computer on the internet is assigned a unique IP address by their internet service provider (ISP), such as Cox Cable, Verizon, etc. An IP Address provides location information of a computer such as country, region, and city. An IP address is much like a mailing address but for your home computer. Everyone has a unique address and it allows other computers to know where you or your ISP is in the world.

Geo-targeting of Ads on LocalAdLink.com

When you first arrive at LocalAdLink.com, the website detects your IP address and related location information provided by your ISP. Using this location data with our geo-targeting technology, business listings in your area are displayed.

When you find yourself in a situation where LocalAdLink.com shows you listings that are not from your area, simply go to the top right of the page to the "Find Businesses in your local area" section and submit your location information (zip code, city, town, state or area code) in order to display the listings in your area. This special case is required since some ISP companies will purchase a large block of IP addresses and register them all with their company's physical mailing address. This type of setup on the ISP's end will cause business listings from another area (the area in which your ISP registered the large block of IP addresses) to be displayed. This is most likely to occur when you are connecting to the internet from hotels, smaller communities or AOL service.

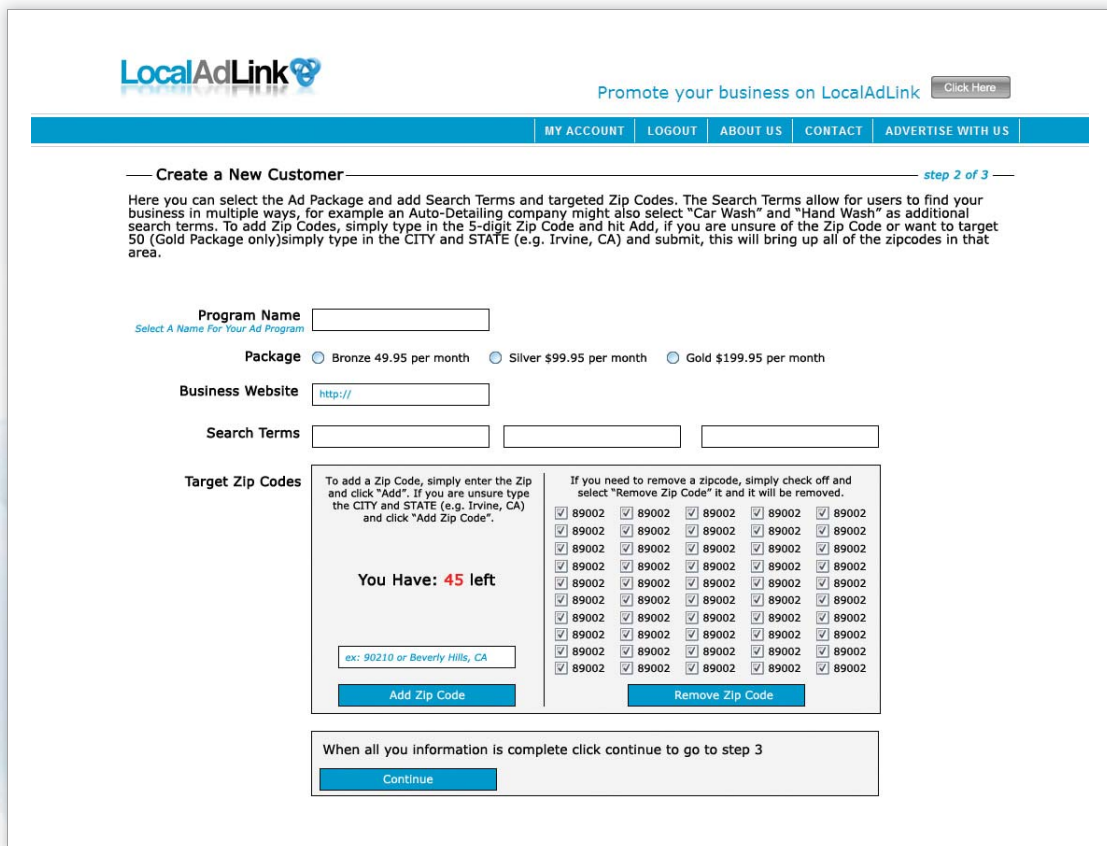

Geo-targeting of Ads on BOOMj and Affiliate Partner Websites

BOOMj and their affiliate partners utilize LocalAdLink's proprietary ad server software in order to display LocalAdLink business listings on their website. The ad server software uses the same LocalAdLink geo-targeting technology in order to display business listings in your area. The ad server will detect their IP address and show LocalAdLink business listings based on where their ISP tells them they are located. Some users may get ads that are in another area, but nationwide that is about 17% of the population. When you find yourself in a situation where LocalAdLink.com shows you listings that are not from your area, simply go to the top right of the page to the "Find Businesses in your local area" section and submit your location information (zip code, city, town, state or area code) in order to display the listings in your area.

How Zip Code Targeting Works:

When a new listing is added to LocalAdLink, our system will ask you to target the zip codes that you would like your listing and advertisements to show up in.

— **Create a New Customer** — step 2 of 3

Here you can select the Ad Package and add Search Terms and targeted Zip Codes. The Search Terms allow for users to find your business in multiple ways, for example an Auto-Detailing company might also select "Car Wash" and "Hand Wash" as additional search terms. To add Zip Codes, simply type in the 5-digit Zip Code and hit Add, if you are unsure of the Zip Code or want to target 50 (Gold Package only) simply type in the CITY and STATE (e.g. Irvine, CA) and submit, this will bring up all of the zipcodes in that area.

Program Name
Select A Name For Your Ad Program

Package Bronze 49.95 per month Silver \$99.95 per month Gold \$199.95 per month

Business Website

Search Terms

Target Zip Codes

To add a Zip Code, simply enter the Zip and click "Add". If you are unsure type the CITY and STATE (e.g. Irvine, CA) and click "Add Zip Code".

You Have: 45 left

If you need to remove a zipcode, simply check off and select "Remove Zip Code" it and it will be removed.
